

## Department of English

### Digital Language Lab

The Digital Language Lab (DLL) represents a significant advancement in language education technology. It provides an interactive and comprehensive platform for language learning. The DLL software has been purchased and installed by the college from Biyani Technologies. It is functional every year. An instructor is appointed to guide the students on how to use devices of DLL. Here are its key features and contributions to an enhanced learning experience.

#### **1. Live Lab**

The Live Lab feature offers real-time interaction between instructors and students. It enables educators to conduct live classes, demonstrations, and interactive sessions, facilitating immediate feedback and dynamic teaching.

#### **2. Assign Assignments**

Teachers can create and assign various types of assignments, including written exercises, projects, and quizzes. This feature supports a structured learning approach and ensures that students have clear objectives and deadlines for their tasks.

#### **3. Create Lessons and Assign Evaluations**

Instructors have the capability to design customized lessons tailored to different proficiency levels and learning goals. They can also assign evaluations to assess student progress and understanding, ensuring that the lessons meet educational standards and learning outcomes.

#### **4. Text Chat**

The Text Chat function allows for instant written communication between students and teachers. This feature supports quick clarification of doubts, facilitates group discussions, and enables asynchronous communication.

#### **5. Audio Chat**

Audio Chat enhances interaction by enabling verbal communication. It is particularly useful for practicing pronunciation, intonation, and conversational skills, as well as for conducting verbal assessments and feedback sessions.

#### **6. Video Chat**

Video Chat provides a more immersive communication experience by allowing face-to-face interaction. This feature is essential for practicing language fluency, conducting oral exams, and engaging in live discussions with visual cues.

#### **7. View Student Screen**

The ability to view student screens allows instructors to monitor student activities and progress in real time. This feature is crucial for identifying areas where students may need additional support and ensuring that they are on task during assignments and exercises.

#### **8. Dictionary**

The integrated dictionary provides instant access to word meanings, synonyms, and usage examples. This tool supports vocabulary building and helps students understand and use new words correctly.

## 9. Pronunciation

The Pronunciation feature offers guidance on correct pronunciation, helping students develop accurate speaking skills. It includes phonetic transcriptions, audio samples, and pronunciation tips.

## 10. Mother Tongue Influence

To address and mitigate the influence of a student's mother tongue on their new language acquisition, the FDLL includes tools for identifying and correcting common interference patterns. This feature helps in minimizing linguistic errors and enhancing language proficiency.

## 11. Pronunciation Practices

The lab provides dedicated exercises and activities focused on pronunciation practice. These include repetition drills, phonetic exercises, and feedback mechanisms to help students refine their accent and pronunciation accuracy.

## 12. Group Discussion

The Group Discussion feature facilitates collaborative learning by allowing students to engage in discussions with their peers. This promotes interactive learning, improves speaking skills, and enhances understanding through diverse perspectives.

The Functional Digital Language Lab is a powerful tool that integrates multiple features to support a comprehensive and interactive language learning experience. By leveraging live interactions, varied communication channels, and targeted educational tools, the FDLL enhances both teaching efficiency and student engagement, ultimately contributing to more effective language acquisition and practice.

Enhancement of Language Skills through the Use of the Language Lab
